

CP Orthopaedics

Case and Bag Solutions

CP Cases Ltd has developed a strong reputation supplying innovative case and bag solutions to medical implant companies.

Loan kits

Leading Orthopaedic implant suppliers offer a loan kit service to enable Orthopaedic surgeons and nurses to select the appropriate implant from a selection of sizes at the point of use.

CP works with these companies to design storage, logistics and transit solutions to meet their particular needs to ensure that service and quality levels are met.

Exhibition Demo Kits

Many Orthopaedic companies require demonstration kits for exhibition of their products and demonstration to medical specialists.

CP can design functional and aesthetically pleasing exhibition packs in aluminium and plastics, with precision routed foam inserts for location and control of implants and tool kits.

Light weight demo kits

Where light weight and portability are required, for example with sales representative demonstration kits, a soft case solution is often the answer.

CP can provide custom designed bags in a variety of tough attractive materials to make multiple demonstrations more convenient.

Sterilised container shipment

CP manufactures cases in rigidised aluminium for shipping steriliser trays between locations. These can be fitted with tough integral wheels for convenient and safe handling.

We are pleased to have helped many medical companies such as Keymed, Stryker, Baxter, Depuy and Gambro provide superior transit and demonstration solutions for their users.
