

The rotomolding process used in the manufacture of Amazon ruggedized cases is ideal for making tough, waterproof products. CP Cases uses a high quality HDPE polymer that thickens at the edges and corners for extra strength and impact resistance.

Amazon Racks Details

Amazon ruggedized racks combine the tough resilience of a rotomolded case with a stainless steel rack frame (an optional aluminium frame is available) which is suspended by 8 (or 16 as an option) anti-vibration mounts. Anti vibration racks are available from 4U to

12U and in two standard frame depths of 19in and 24in.

Amazon 19in racks are designed to function in extreme conditions and survive rough handling in field conditions.

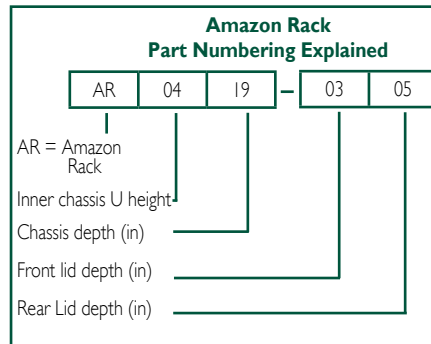

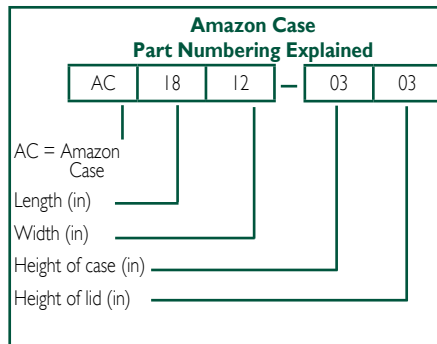

Amazon ruggedized racks comply with MIL-STD 810F and are rated IP65.

Amazon Racks combine the tough resilience of a rotomoulded case with a lightweight rack chassis and elastomeric suspension system.
